DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to implementing a pulse width modulated current regulator, are classified in class 323, subclasses 265 and 271.
- II. Claims 11-28, drawn to reducing thermal dissipation by implementing a circuit comprising a drive circuitry, output circuitry, a feedback amplifier and an error amplifier, classified in class 327, subclasses 54.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the function of the combination as claimed is to implementing a pulse width modulated current regulator. The subcombination has separate utility such as using drive circuitry, output circuitry, a feedback amplifier and an error amplifier to reduce thermal dissipation in a single PLC package.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/751,233

Art Unit: 2116

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Paul B Yanchus whose telephone number is (703) 305-8022. The

examiner can normally be reached on Mon-Thurs 8:00-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lynne H Browne can be reached on (703) 308-1159. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
